Maintenance Manual : Do's and Don't's

- Table tops should be cleaned using mild soap solution & wiped with dry cloth.
- Metal powder coated surfaces should be cleaned using gentle soft cloth
- Don't use thinner or water to clean stains from surfaces of table tops and metal powder coated parts.
- Don't place utensils containing liquid, hot material, sharp objects like knives, scissors which may damage or scratch the surface.
- Don't place hot objects such as electric skillets directly on table top surfaces as prolonged exposure to heat may cause damage.
- Chairs should be cleaned using dry cloth to wipe fabric wrapped seats, nylon base and metal power coated surfaces.
- Vacuum cleaning is recommended once in 3 months for chairs
- PET material should be cleaned with wet cloth/ disinfectant and should be stored in folded condition when not use.
